

## 8-Port Gigabit Ethernet PoE+ Switch

IEEE 802.3at/af Power over Ethernet (PoE+/PoE) Compliant, 140 W, Endsban, Desktop, 19" Rackmount

Part No.: **560641**

Save installation time and money with PoE.

The Intellinet 8-Port Gigabit Ethernet PoE+ Switch (560641) is designed to pass both data and electrical power to a number of PoE-compatible devices via standard Cat5e or Cat6 network cables. Equipped with eight Gigabit Ethernet ports, this switch can power wireless LAN access points and bridges, VoIP phones, IP video cameras and more while delivering network speeds of up to 1000 Mbps.

### Power over Ethernet 802.3at

The Intellinet 8-Port Gigabit Ethernet PoE+ Switch supports the IEEE 802.3at protocol and is designed to inject up to 30 watts of power per port\*. IEEE802.3af- or IEEE802.3at-compliant devices attached to the switch require no additional power, thus eliminating the time and expense of electrical rewiring and minimizing the unsightly clutter caused by power supplies and adapters in awkward places such as ceilings and walls. Any mix of PoE and non-PoE devices is supported, and thanks to its short circuit, overload and high-voltage protection function, your equipment is well-protected. For devices that are not 802.3at/af compliant (legacy wireless access points or network cameras), we suggest the use of an Intellinet PoE/PoE+ Splitter.

\* Total PoE budget for this switch is 140 watts. Per-port average power distribution is 17.5 watts; maximum per-port power usage cannot exceed 30 watts.
